

Job Opening

Site Manager

Responsible for designing, developing and implementing environmentally sound work systems, safety systems and management systems for the efficient functioning and management of a quality lumber manufacturing facility. Position includes on going work related to the conversion of a large log sawmill to a smaller log sawmill. Requires a Bachelor's degree or equivalent in Engineering Management, Industrial Engineering, or a related field, plus four years of experience in a managerial position in a quality lumber manufacturing facility, which includes experience: designing, developing and implementing environmentally sound high performance work systems, management systems and site-wide safety systems; and designing a curve sawmill to recover dimension lumber from small logs. Experience may be gained concurrently. Compensation includes salary and standard company benefits.

Position with Jordan Forest Products LLP in Barnesville, Georgia. Interested candidates may submit an application to John Coyle at **[P.O. Box 98 Mt. Gilead N.C 27306]**
